

TCP Link for ATEM (on Blue Pill) License

SKAARHOJ TCP Link for ATEM (on Blue Pill) License

The dclink-tcp application on the SKAARHOJ Blue Pill offers a powerful, updated version of the legacy 'TCP Link for ATEM.' This application provides a simple, unified TCP-based ASCII interface for controlling Blackmagic Design ATEM switchers, allowing for seamless integration with AV devices. By purchasing a license, users can access full functionality, including single device connections to ATEM switchers and support for various commands like Cut, Aux input selection, and macro execution. This solution provides a comprehensive and easy-to-use way for controlling ATEM switchers for AV integrators using Crestron and similar systems.

Benefits

- Control your ATEM switcher via a simple TCP interface
- Works as a drop-in replacement for legacy 'TCP Link for ATEM' installations
- Supports various commands, including video input selection, macro actions, and transitions
- Ideal for AV integrators needing to control an ATEM switcher from Crestron and similar systems.

Features

- TCP-based ASCII interface for controlling ATEM switchers
- Supports legacy protocol and commands for easy integration
- Control multiple parameters, including program inputs, transitions, keyers, and more
- Run the application on any SKAARHOJ Blue Pill device
- 10-minute free trial period, with full functionality available after purchasing a license
- Licensing enables unlimited use of TCP Link for ATEM on a Blue Pill device
