

# Touch on Raw Panel License

## *SKAARHOJ Touch on Raw Panel License*

The Touch on Raw Panel application allows users to create software UIs accessible through browsers, appearing on the local network as Raw Panel devices. Upon purchasing a license, these UIs can be integrated with third-party applications and SKAARHOJ's Reactor™ for broadcast control, automation, and monitoring. The solution offers easy configuration and can be accessed from any touch device or desktop computer using HTTP and SVG technology, enabling fast, efficient, and cost-effective control options.

### Benefits

- Create software UIs that work on both touch devices and desktop PCs
- Integrate touch control without needing additional development
- Easily configure touch panels with Quick Classes
- Access touch UIs across local networks with simple setup
- Evaluate the system with a free trial before committing to purchase

### Features

- Web-based touch UIs accessible via any browser
- Supports connection to Raw Panel devices over TCP
- Create touch panels with SVG technology for responsive design
- Works with Reactor for advanced configuration and control
- Supports multiple devices with a single license (up to 10 distinct applications)
- 10-minute free trial period with full functionality, available with a paid license
- Cost-efficient and flexible licensing for extensive touch UI deployment
