

HID Devices on Raw Panel License

SKAARHOJ HID Devices on Raw Panel License

The HID devices on Raw Panel application (xpanel-hids package) allows one or more supported USB devices to be connected to SKAARHOJ products via USB-A. These HID devices are transformed into Raw Panel-compliant devices, enabling easy integration with SKAARHOJ control panels. By purchasing a license, you can integrate various HID devices like foot switches, joysticks, and gamepads into your SKAARHOJ setup, enhancing your control workflows across broadcast, automation, and AV systems. The solution supports multiple devices through a powered USB hub, offering seamless communication with Reactor and third-party Raw Panel applications.

Benefits

- Integrate HID devices into your SKAARHOJ control system with ease
- Supports a range of HID devices such as foot switches, gamepads, and joysticks
- Network-enable HID devices for seamless integration with Reactor and third-party applications
- Support up to 10 HID devices with a single paid license
- Easy configuration with the Web UI and Raw Panel Explorer

Features

- Transform HID devices into Raw Panel compliant devices
- Supports various HID devices including Tangent Ripple, USB gamepads, and Logitech presenters
- Network-enabled HID devices for use with Reactor and third-party Raw Panel applications
- Supports multiple HID devices through a powered USB hub
- 10-minute free trial period, with full functionality available through a paid license
- Licensing allows up to 10 USB devices to be connected and Raw Panel enabled per Blue Pill device
