

Wood Frame for 1 M/E configuration Built To Order

SKAARHOJ Wood Frame for 1 M/E configuration

The Wood Frame for 1 M/E configuration is a beautifully crafted mahogany wood frame designed to enhance the aesthetic appeal of SKAARHOJ's larger controller enclosures when arranged for modular use. Custom ordered to the specific length of modules aligned side by side, this frame not only adds a touch of elegance but also provides sturdy support for the controllers. Ideal for broadcast studios, live production settings, or any environment where visual appeal and functionality are paramount, this wood frame elevates the professional appearance of your setup while ensuring the durability and stability of your equipment.

Benefits

- Enhances aesthetic appeal with beautiful mahogany wood
