

# 1ME Mega Panel - Draco

*SKAARHOJ Mega Panel Draco - modular 1ME switching panel with 36 crosspoints*

The SKAARHOJ Mega Panel is a modular concept within SKAARHOJ's hardware lineup. SKAARHOJ products are well known and recognized for their unparalleled software flexibility—supporting multiple brands and allowing customization down to the single-button, encoder, and fader level.

With Mega Panel, we take it one step further. In addition to software flexibility, we now offer hardware flexibility. With modular components, you can build a control panel that perfectly fits your needs—simply join panels together to create a multi-ME or multi-crosspoint surface, expanded with auxiliary macro, audio, and PTZ sections.

Component selection is entirely up to you. However, to help you get started, we've designed five ready-to-go sets: Lyra, Draco, Orion, Cygnus, and Vela. These sets can be purchased as bundles but can also be customized by adding or removing modules.

## Benefits

- Works with major broadcast systems (Kairos, TriCaster, AMPP, Carbonite, ATEM, vMix and more).
- One control surface integrating multiple panels.
- Slim enclosure ideal for in-table mounting.
- Fully customizable software setup.

## Features

- 1ME live switching modular panel.
- Consists of T-BLOCK-L-V1B-SBK, 3 x MK48-V1B-SBK, QUICK-SHOT-V1B-SBK
- 36 crosspoints, transition module and quick shot module.
- All modules connect over 1Gb PoE Ethernet creating one surface.

Physical and Shipping	
In The Box	1 x T-BLOCK-L-V1B-SBK 3 x MK48-V1B-SBK 1 x QUICK-SHOT-V1B-SBK
Recommended Accessories (not included)	1Gb Ethernet PoE switch with minimum 5 ports (not included) 4 x Ethernet Cable: Cat 6 S/FTP or better
Country of Origin	Denmark
EAN Code	5714074003564
